4 Grow the Business Through Both M&A and Organic New Store Openings

U.S. convenience store industry crowded with small chains

The U.S. convenience store industry is characterized by a large number of small businesses. As of December 31, 2022, there were around 150,000 convenience stores nationwide, and chains of 10 stores or fewer and privately owned stores account for about 65% of the total. The number of top-10 stores, including SEI (13,167 stores), which ranks first, account for approx. 20% of the market. As such, the industry is very fragmented, and restructuring efforts are gathering pace. The United States is also the world's second largest automobile market after China, and a major feature is that around 80% of U.S. convenience stores have fuel stations.
