## 2. Methodology

Bureau Veritas conducted the verification in accordance with the requirements of the international standard 'ISO 14064-3(2006): Greenhouse gases - Part 3: Specification with guidance for the validation and verification of greenhouse gas assertions'.

As part of Bureau Veritas' assurance, the following activities were undertaken:

- Interviews with relevant personnel of Seven & i responsible for the identification and calculation of GHG emissions;
- Review of Seven & i's information systems and methodology for collection, aggregation, analysis and review of information used to determine GHG emissions; and
- -Audit of a sample of source data to check accuracy of quantified GHG emissions.

## 3. Conclusion

Based on the verification work and processes followed, there is no evidence to suggest that the GHG emissions assertions shown below:

- · are not materially correct and are not a fair representation of the GHG emissions from activities within the scope of work
- are not prepared in accordance with the methodology for calculating GHG emissions established and implemented by Seven & i.
