## Promotion Framework

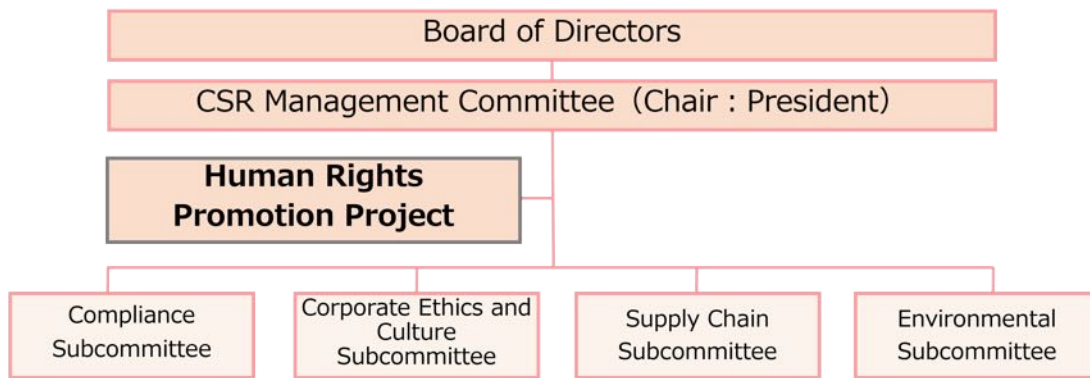

The Human Rights Promotion Project has been established as a cross-Group organisation to promote the Human Rights Policy in the Group, and ongoing efforts are being made to implement it. The project involves the chairpersons of each of the four subcommittees under the CSR Management Committee (the Corporate Ethics and Culture Subcommittee, the Supply Chain Subcommittee, the Compliance Subcommittee, and the Environmental Subcommittee), as well as the Human Rights Education Center. The project promotes human rights due diligence initiatives, including identification of business-specific human rights issues, corrective actions, regular monitoring, and information disclosure. Meetings of the Human Rights Promotion Project develop plans of human rights initiatives and review the progress.

The Corporate Ethics and Culture Subcommittee under the CSR Management Committee regularly shares the progress on efforts related to human rights education. It advances activities aimed at having all employees of Group companies correctly understand and recognize human rights, along with fostering a corporate culture free of discrimination or prejudice. The Supply Chain Subcommittee under the CSR Management Committee requests that suppliers understand the Seven & i Group's approach to human rights and implement ongoing initiatives. The Compliance Subcommittee promotes the practice of employees' words and actions that respect the human rights of our suppliers. The Environmental Subcommittee promotes procurement activities that respect human rights based on sustainable procurement principles and policies.

In addition, the Human Rights Education Center conducts various awareness-raising and educational activities in cooperation with the human resource departments and CSR promotion departments of each Group company.

These human rights initiatives are reported and shared at the biannual meetings of the CSR Management Committee.

## Human Rights Due Diligence

We have a human rights due diligence mechanism in accordance with procedures set forth in the UN Guiding Principles on Business and Human Rights and OECD Due Diligence Guidance for Responsible Business Conduct, and strive to prevent or mitigate any negative impact on human rights.

If it becomes clear that our business activities have caused or contributed to human rights abuse, we will work to correct and remedy the situation. Even if our business activities have not caused nor contributed to human rights abuse but if our products or services have been directly linked to the impacts through business relationships, we will encourage our business partners to correct and remedy the situation.

Human Rights Due Diligence Process

## Human Rights Impact Assessment

We recognize that its business activities may have an impact on human rights. We are committed to identifying the causes of negative impacts on people and society, and to reduce and remedy the negative impacts we identify.

In 2022, we conducted an assessment of the potential negative human rights impacts of our operations and those of our business partners. We conducted interviews and surveys of our own company and supply chain to identify human rights issues. We evaluate human rights risks and mitigate the risks by calculating and mapping the severity and likelihood of occurrence of the identified human rights issues based on human rights risk indicators published by international organizations and others. The identification of such human rights issues is conducted with the support and advice of external experts.

Human Rights Risk Map (human rights issues identified in our corporate activities)

- \* For each human rights issue, " Possibility of Occurrence" and "Severity" were calculated and mapped.
- \* In calculating the possibility of the likelihood of human rights issues in each country, we used indicators published by international organizations such as BHRRC and ESG Data Model.
- \* For severity, scores were calculated based on scale, scope, and irremediability.

## Implementation of Preventive and Corrective measures

We identify human rights issues (and countries/regions) that we will focus on preventing and responding to. For those high-priority human rights issues identified we implement corrective measures within the group as well as education, training, and other activities aimed at prevention. For human rights issues in the supply chain, we continuously engage in dialogue and consultation with relevant stakeholders and disseminate guidelines to improve and enhance our efforts to respect human rights, and take corrective measures when risks become apparent.

We are proactively implementing initiatives for normalization, improvement of occupational health and safety, and diversity in order to create a pleasant and rewarding work environment for our employees.

## Human Rights Slogan Contest

To create a corporate culture in which each employee's human rights are respected in accordance with the Corporate Action Guidelines, each year the Seven & i Group solicits human rights slogans from all employees, including part-time employees, and their family members. In the process of coming up with human rights slogans, opportunities are created for employees to think about human rights, which raises their awareness of human rights issues. The most excellent slogans selected from among those submitted are announced to the employees through the Group's internal newsletter and on the intranet website, and are awarded prizes. The contest was held for the 32th time in the fiscal year ending February 28, 2023, and 21,292 slogans were received, marking yet another year with a large number of submissions. The slogans emphasized reconsidering the importance of human rights, touching on everything from personal feelings in one's daily life to musings from a broader perspective.

## Awareness-Raising Activities for Supply Chain

We hold briefing sessions on the Seven & i Group Business Partner Sustainable Action Guidelines and CSR audits in China and South East Asia, where CSR risks are considered to be high, only through live and on-demand distribution. Approximately 660 participants from 492 companies took part in the live broadcast.

To ensure that suppliers understand the Seven & i Holdings Business Partner Action Guidelines, Seven & i Group administers a self-check sheet for suppliers that explains all of the specific requirements for compliance. The self-check sheet contains 61 questions, including human rights-related questions. For example, the questions ask whether or not factory employees have access to consulting desks and whether or not the company requests that its own suppliers comply with the Seven & i Holdings Business Partner Action Guidelines. Responses are entered into a database, and the data are used in the process for determining whether to continue doing business with the suppliers.

## Grievance Mechanism and Remedies

Seven & i Holdings has established the Groupwide Employee Helpline as an internal whistleblowing system for employees of our operating companies in Japan, their families, and retirees, to prevent conduct that could result in loss of public credibility and to ensure early detection, early remediation, and recurrence prevention. This is also a system that can be used in the event of human rights issues.

In addition, we have established a "Business Partner Helpline," as an internal whistleblowing system for consultation and reporting by directors, employees, and former employees of suppliers of domestic group companies. The helpline is operated by a third party with whom we have concluded an outsourcing agreement and a confidentiality agreement, thus the privacy of the person making the report or consultation is strictly protected. Upon receiving a report or consultation, we will confirm the facts and resolve the issue, if necessary, after obtaining the consent of the person consulting. In addition, the operation rules of the reporting desk stipulate that no disadvantageous treatment will be given to the person consulting or to those who cooperate in confirming the facts.

The Audit & Supervisory Board Hotline has been in operation since February 2019 for the purpose of receiving reports independent of management related to actions that could potentially result in the loss of social trust in which the directors, members of the Audit & Supervisory Board, executive officers, and other members of management for Group companies in Japan are suspected of being involved, and investigating them. When the Company receives a report, it quickly confirms the facts, and the members of the Seven & i Holdings Audit & Supervisory Board work together with the members of operating company Audit & Supervisory Boards to correct any violations that are found and strive to prevent a recurrence.

## Human Rights Risk Assessment Process

---

Step.1 Organize stakeholders in the value chain and human rights issues

While taking into account the Group's value chain and business activities, we identified human rights risks and organized human rights issues based on interviews with each of the Group's operating companies and the results of CSR audits.

Step.2 Human rights risk assessment within the Group and its supply chain

Human rights risk assessments were conducted for the businesses of major group companies (14 businesses) and business partners (122 businesses).

Step.3 Creating a Human Rights Risk Map

Based on the human rights risk assessment, a severity score and a likelihood of occurrence score were calculated for each human rights issue and mapped to each.

Step 4: Information Disclosure

The process and results of Steps 1-3 were made publicly available on the website.

■ External Review and Evaluation Criteria Throughout the entire process, we exchanged views and obtained advice from experts in the field of human rights. In identifying and assessing negative impacts, we utilized the Business and Human Rights Resource Centre (BHRRC) database and conducted research on internationally identified human rights issues in the industry.

## Method for Calculating Score of Severity and Likelihood

---

A list of human rights issues related to the Group's major businesses was compiled and each human rights issue was mapped on an axis of severity and likelihood of occurrence.

### ■ Severity

As described below, a severity score was calculated for each human rights issue by examining and scoring three factors: (1) size, (2) scope, and (3) difficulty in remedying the issue.

#### ● Process 1

1. Scale: severity of negative impacts that may occur - Possibility of multiple fatalities or injuries per accident if risk materializes

2. Scope: Number of people who may be negatively affected (or percentage of target stakeholders who may be affected) - The potential impact on employees, customers, local residents, and civil society if the risk materializes, and the number and percentage of such employees, customers, local residents, and civil society if the risk materializes.

3. Difficulty of remedy: constraints in restoring the negatively affected person to the pre-affected state or to a state equivalent to the pre-affected state - if the risk has materialized, whether it is difficult to recover in time or whether monetary remedy is available.

● Process 2 The three elements are rated on a 5-point scale from Very Low to Very High for each human rights issue.

● Process 3 The average score of the factors was used as the severity score for each human rights issue.

### ■ Likelihood

The likelihood of occurrence was calculated for each human rights issue as follows

● Process 1: Potential human rights challenges in each country  
Scope of countries: Countries where the company and its group companies are based and where 7-Eleven stores under license agreements are located (21 countries)  
Research the likelihood of each human rights issue occurring in each country based on the following information

- Human rights risk indicators by country published by international organizations, etc.
- For human rights issues not covered by the above indicators, the number of incidents of human rights violations by country for each human rights issue, as published by the Business and Human Rights Resource Center (BHHRC).
- The likelihood of occurrence is converted into a score on a scale of 0 to 10 (0 being low risk and 10 being high risk).

● Process 2: Country-specific weighting

- The number of issues that are likely to occur in each country is further adjusted to your company's actual situation.
- Weighting adjustments were made to achieve values
- Weighting is based on total number of employees Scores are calculated by weighting the 10 scores by the above weights.

● Process 3: Fine-tuning for each human rights issue

• Adjustment of the potential/apparent occurrence of each human rights issue in the Group, based on business characteristics and interview results.

● Process 4: Calculation of likelihood score

Calculation of likelihood score Country-specific likelihood of occurrence scores for each weighted human rights issue and in Work 3. Manifested/potential human rights issues in the supply chain, organized by issue. The total score for the likelihood of occurrence of each human rights issue by country is calculated by summing the scores of the likelihood of occurrence of each human rights issue by country. Calculate Score

## Step.1 Organize Stakeholders in the Value Chain and Human Rights Issues

The following human rights issues are plotted on the risk map by stakeholder.

※2 The likelihood is converted into a score on a scale of 0 to 10 (0 being low risk and 10 being high risk)

### Step.3 Creating a Human Rights Risk Map

Each human rights issue was mapped for the company and its supply chain, with severity on the vertical axis and likelihood of occurrence on the horizontal axis.

For identified high-risk human rights issues, specific measures to reduce risk will be considered and implemented.
